

Sundhar V

86674 58806, 96006 89632 . sundharv.cse@gmail.com . <https://sundhar811.github.io/>

Full stack developer with proficiency in Python and JavaScript. Willing to learn new tools and technologies. Looking for software engineering opportunities. Passionate about coding, solving problems and management. Willing to relocate.

EXPERIENCE

Zoho Corporation - *Member Technical Staff*

MAY 2019 - PRESENT

- Implemented a specific module within Zoho Desk, which is a customer service SaaS application.
- Responsibilities include designing and implementing reusable components and user friendly features.
- Spearheaded a PoC in the application to mitigate memory overloading.
- Learned bash out of interest and created a script that automated a repetitive task performed by the developers thereby saving a significant amount of time for the developers in the team.

Zoho Corporation - *Project Trainee*

DEC 2018 - APR 2019

- Gained experience in Java, Struts, API development using Java, JavaScript, React, Redux and SDLC.
- Projects completed during internship: <https://github.com/sundhar811/Training>.

National Informatics Center, Madurai - *Intern*

DEC 2016 - JAN 2017

- Created an application that stores data and generates reports for a government welfare scheme.
- Resulted in moving the storage of data from paper records to digital records which resulted in massive increase in productivity for the administrative staff.

EDUCATION

Thiagarajar College of Engineering - *B.E. Computer Science and Engineering*

JUN 2015 - MAY 2019

- Graduated *First Class with Distinction* with **9.07/10** CGPA.
- Awarded Student Achievers award in 2017, 2018, 2019.

SKILLS

- Languages: Python, JavaScript/HTML/CSS, SQL, Bash, C, C++, Java.
- Frameworks and Libraries: Django, Flask, React, Redux, Node.js, Express.js.
- Tools: Git, Linux, AWS S3, JWT, Webpack.

PROJECTS

Trivia Blog

[View Deployed Application](#) | [Source Code](#)

A blog application where users can share trivia posts with other users. Application developed using **Django** framework, AWS S3, Gmail SMTP and deployed using Heroku.

Employee Portal

[View Application Overview](#) | [Source Code](#)

An application created for internal handling and maintaining of employee information in an organization. Developed using **Flask** framework and MySQL.

Social Media Clone

[View Deployed Application](#) | [Source Code](#)

An online community where users can interact with each other. Developed using **MERN**(MongoDB, Express.js, React, Node.js) stack and deployed using Heroku.
